

QUIZ TODAY!
STUDY!

1. Rank from least inclusive (smallest) to most inclusive (largest): biosphere, biomes, ecosystem, communities, population, organism
2. State the difference between biotic and abiotic factors.
3. What percent of energy transfers to the next highest trophic level in energy flow?
4. _____ is the species role or way of life in an ecosystem.
5. What are bio geochemical cycles?

BIOMES

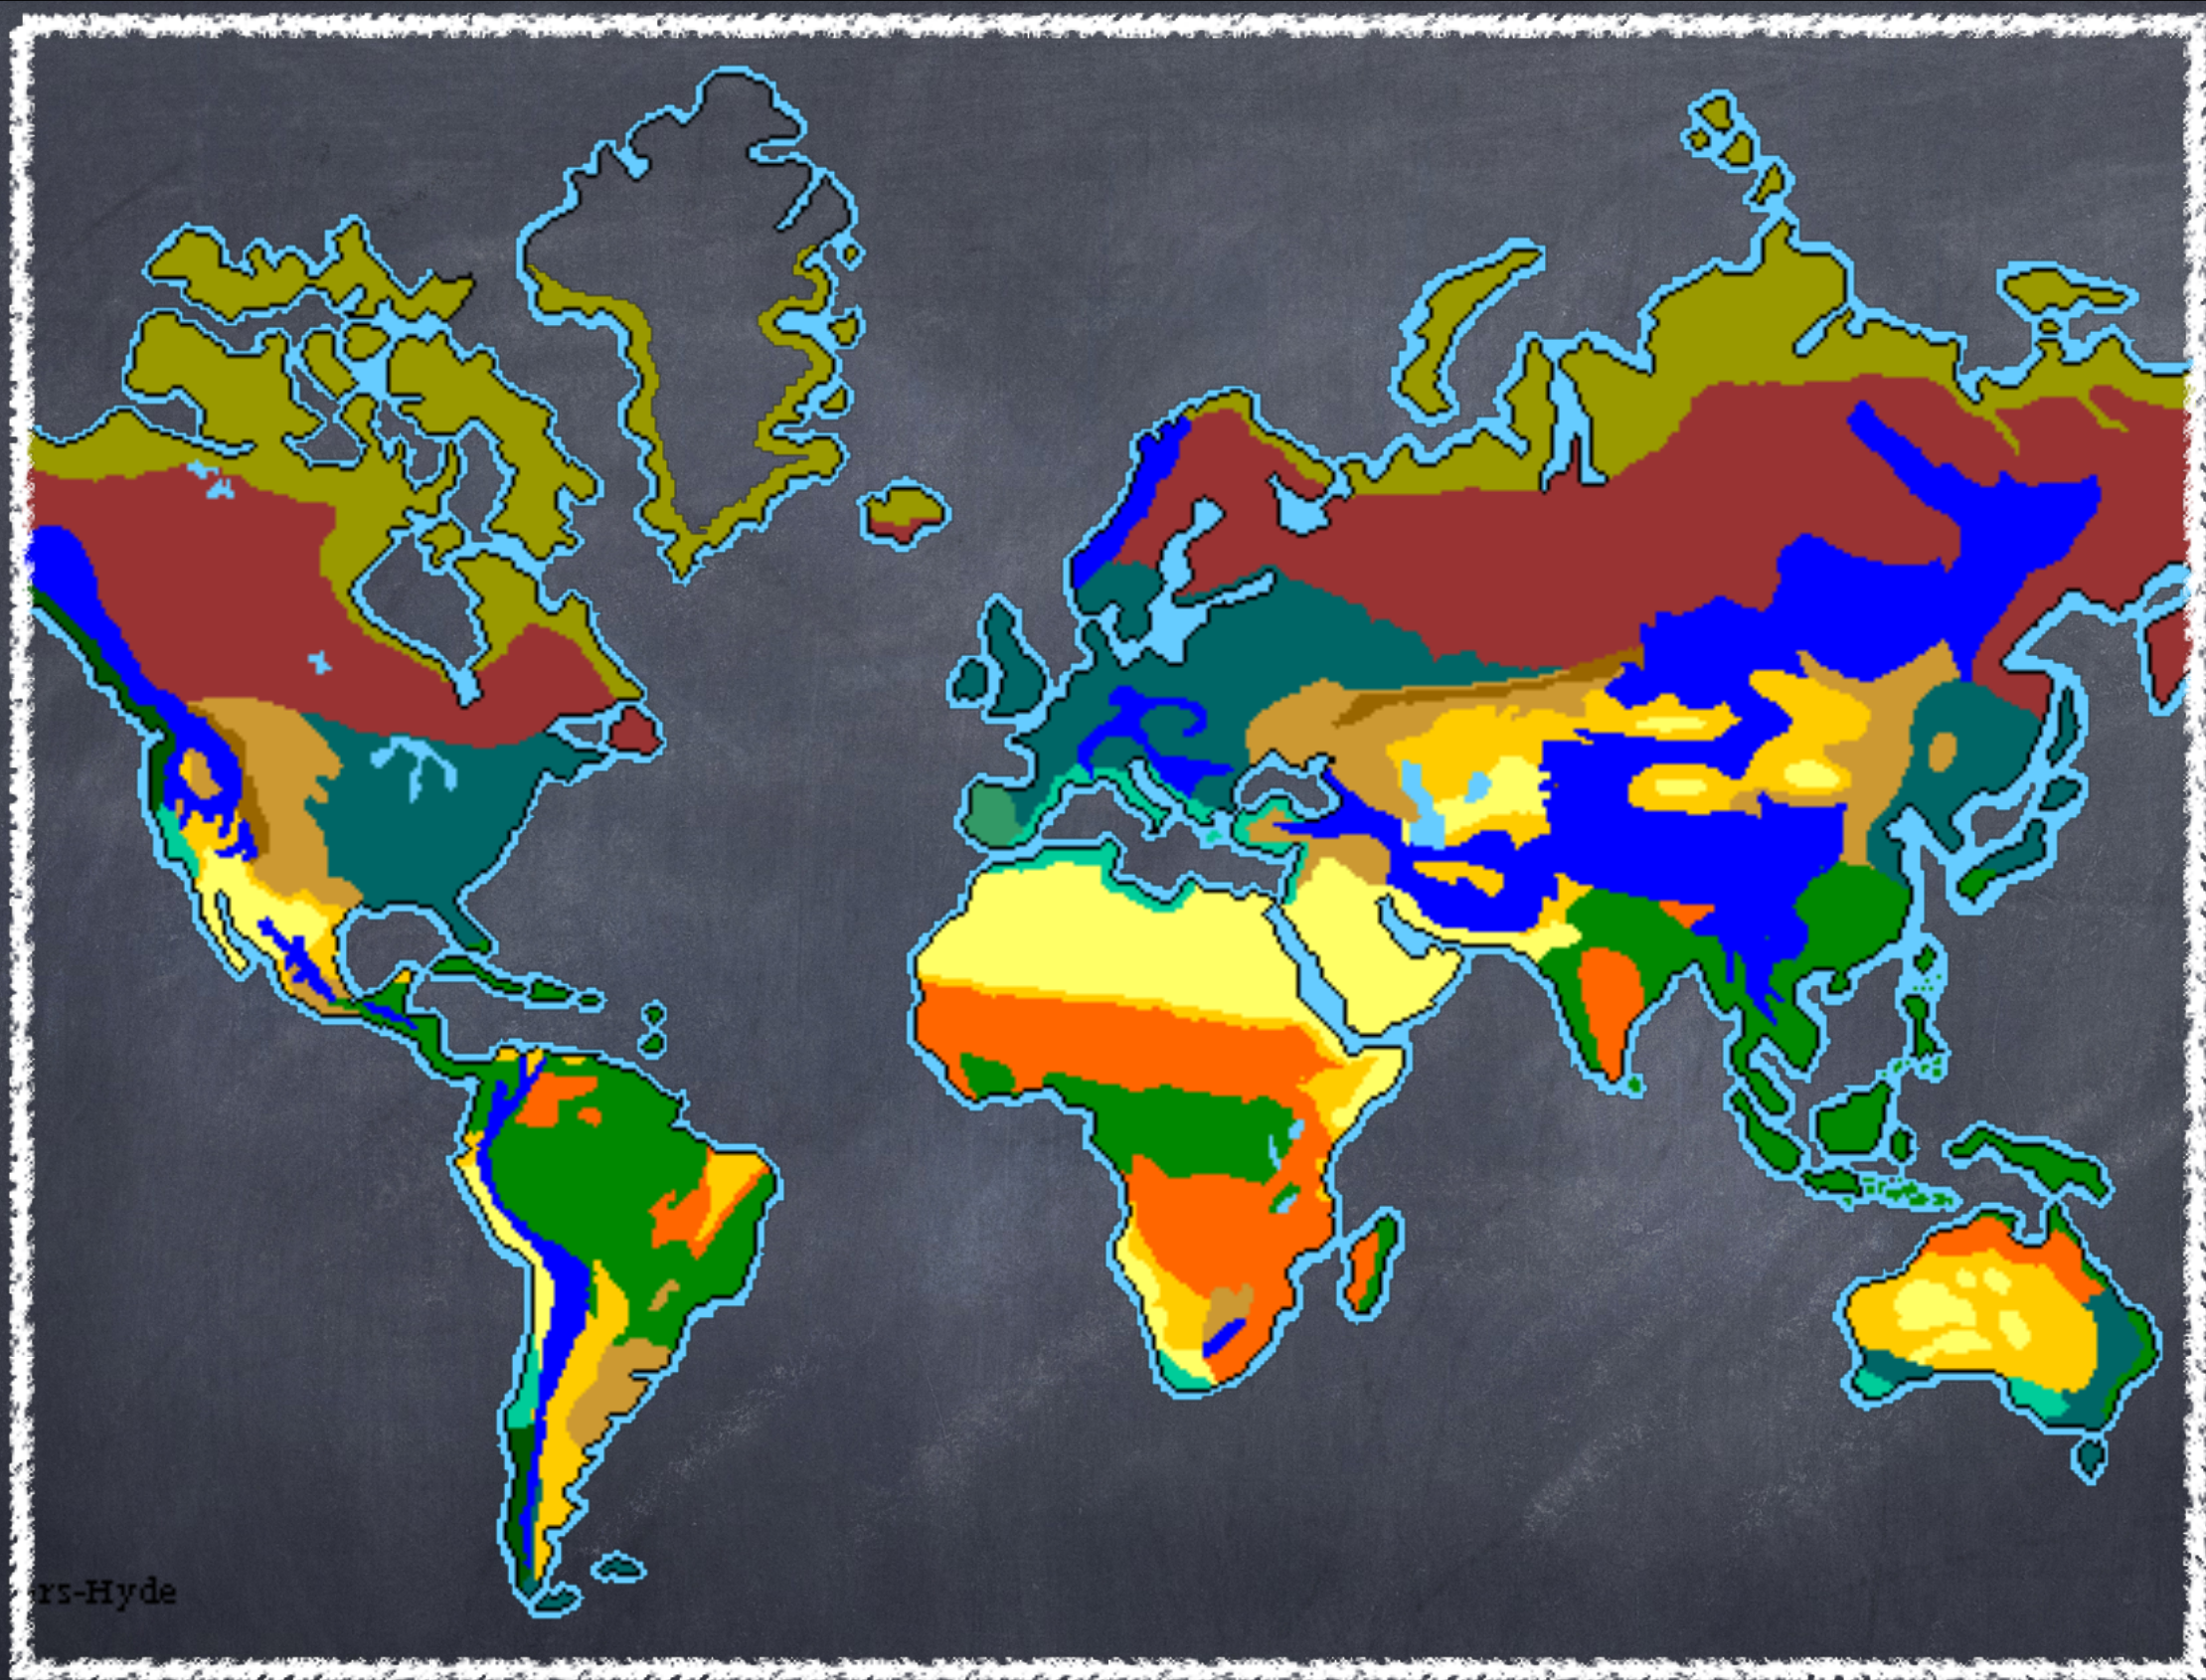

THE MAJOR BIOMES

- Biomes are distinguished by the presence of characteristic plants and animals, but they are commonly identified by their dominant plant life.

THE MAJOR BIOMES

- Tundra
- Tropical rainforest
- Temperate forest
- Taiga
- Temperate grassland
- Savanna
- Chaparral
- Desert
- Ocean zones
- Freshwater
